

XB PRIMER PRO

A CABINET SPECIFIC PRIMER COAT

MULTI-LAYER COATING SYSTEM

The base of the N-Hance Multi-Layer Coating System is the application of our XB Primer. This specialized primer provides the durable foundation your cabinet makeover needs to last for many years to come.

- ✓ Specifically designed for use on cabinets
- ✓ Fills imperfections and wood grain up to twice as well as typical primer
- ✓ Provides a smooth and even foundation for colour and finish
- ✓ Strong adhesion properties reduce cracking, peeling, and other forms of coating failure
- ✓ Tested and proven to withstand temperature changes over time
- ✓ A water based product with ultra-low VOCs (Volatile Organic Compounds) makes it a safer option for homes.

XB Primer is specially formulated to provide better coverage for wood grain and other imperfections on cabinets. It fills in the wood grain preparing a smoother base surface for your cabinet makeover.

XB Primer ensures not only a beautiful cabinet makeover, but one that is durable enough to remain beautiful through daily use of your kitchen.

Traditional Primer

Woodgrain and imperfections can be seen.

XB Primer

Smother surface with less woodgrain and imperfections showing.

N-Hance has pioneered the use of water-based urethane primer in this industry. Compared to oil-based primers, water-based products are an eco-friendlier choice. Water-based primers also have fewer VOCs off-gassing, making them a safer choice for your family as well.

The kitchen is one of the most used spaces in any home. Having a solid, durable foundation for your cabinet makeover is critical to ensure it lasts.
